## Cyanamide

[420-04-2]

Cyanamide, H<sub>2</sub>NCN, is ranked as the amide of cyanic acid, HOCN. In the presence of higher functions, cyanamide derivatives are indexed at the preferred name, e.g., Benzenesulfonic acid, 4-(cyanoamino)-; L-Glycine, N-cyano-. Prior to Volume 76, cyanamide derivatives attached directly to ring systems were usually indexed, in the absence of higher functions, at conjunctive names based on the rings with the suffix "cyanamitrile". Such compounds are now indexed at this heading. Thus, the compounds formerly indexed at
